

STONE DIVISION | EXPERIENCE SET IN STONE

RECONSTITUTED SANDSTONE QUOINS & CILL FEATURES

A BEDROCK OF EXPERIENCE

As third generation quarry owners and quarry masters, The Clarke Group are a company with in-depth experience of the stone we draw out of the Irish bedrock.

We produce highly attractive natural stone – limestone, sandstone and granite – quarried at our headquarters in Lisnaskea, County Fermanagh, and from our modern facility in County Cavan. We can also produce high quality cast-stone products such as quoins, cills, jambs and heads.

Both our natural and cast-stone has been used in prestigious public, commercial and domestic buildings throughout Ireland.

SPECIFY CLARKE CAST-STONE WITH CONFIDENCE

The advantages of cast-stone are well known: cost-effectiveness and maintenance free life span.

By using modern production techniques, (all our products are manufactured to BS1217) we have the flexibility and capability to produce a complex range of products.

Our highly controlled wet and dry-cast manufacturing process means architects, designers, contractors and builders can confidently choose **Clarke cast-stone** range for quality and price.

RECONSTITUTED SANDSTONE PIER CAPPINGS

RECONSTITUTED GRANITE HEAD FEATURE

NATURAL STONE

The Clarke Group quarries the ancient stone that shapes the contours of Ireland, for its properties as a natural building and ornamental material.

With a choice of three natural stone products, we offer architects, landscape architects, designers, builders and homeowners excellent design opportunities to create an authentic and stylish appearance in and around public and private built environments.

THE CARNMORE MIX

A traditional sandstone mix accentuated by its own natural colours.
